Final Rejection

Applicant's arguments filed 10/21/03 have been fully considered but they are not persuasive for reasons detailed below.

The 35 U.S.C. 112 rejections are maintained or modified as follows:

These rejections have been withdrawn.

The prior art rejections are maintained or modified as follows:

New claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Ritola (US '755).

Regarding claim 1 and 2, Ritola teaches an apparatus (Fig. 1-5) comprising a substantially vertical conveyor (30), sorting compartments (40), and a transfer device including a transfer member (72), wherein said transfer member moves in and out of a gripping and rest position on a side of the conveyor "facing the sorting compartments" (col. 3, ln. 68 et seq.).

New claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Dron (US '307).

Dron teaches an apparatus (Fig. 2-4) comprising a substantially vertical conveyor (45-49), sorting compartments (near 54-58), and a transfer device including a transfer member (62), wherein said transfer member moves in and out of a gripping and rest

Art Unit: 3653

position on a side of the conveyor "facing the sorting compartments" (Fig. 3; col. 3, ln. 10 et seq.).

Claims 1-4, 9, 10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Klyver et al. ("Klyver") (US '331).

Klyver teaches an apparatus (Fig. 1-3) comprising a substantially vertical conveyor (15, 31, 32), sorting compartments (near C), carriers (near 55) and a transfer device including a transfer member with roller paths (Fig. 3, near 56), wherein said transfer member moves in and out of an active position outside the conveyor path (Fig. 3; p. 2, ln. 98 et seq.).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Klyver in view of what is well known in the art as demonstrated by Ritola.

Klyver as set forth above teaches all that is claimed except for expressly teaching circulating driven belts for moving the objects. This feature, however, is well-known in the conveying arts. Here, the mere use of circulating driven belts cannot be considered novel when the majority of conveying devices use driven belts to convey objects. Ritola

Art Unit: 3653

demonstrates that driven belts are used with elongate objects (Fig. 1, 2; belt 30) and that these belts can be regarded as well known functional equivalents to the roller paths previously discussed. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the invention of Dron as taught above.

Allowable Subject Matter

Claim 8 is allowed.

Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Examiner has maintained the prior art rejections, statutory rejections and drawing objections as previously stated and as modified above. Applicant's amendment necessitated any new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3653

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
